## 2. General Risk Warning

Trading foreign exchange and derivative financial products carries a high level of risk and may not be suitable for all investors. The use of leverage can work both for and against you and may result in the rapid loss of all of your invested capital. You should not invest funds you cannot afford to lose.

Before engaging in any transaction you should carefully consider your investment objectives, level of experience, risk appetite and, if necessary, seek independent professional advice.

## 3. Leverage and Margin Risk

Leveraged products allow you to control a notional position much larger than the funds deposited as margin. Small adverse market movements can result in losses exceeding your initial deposit. Margin requirements may be increased without prior notice in response to volatile market conditions.

## 4. Market, Liquidity and Gapping Risk

Markets may move rapidly against your position. Insufficient liquidity, gapping at market open, news events and weekend price gaps may result in your stop-loss orders being executed at prices materially worse than the level specified ('slippage'). We do not guarantee that any stop-loss, take-profit or pending order will be filled at the requested level.

## 5. Counterparty and Liquidity Provider Risk

As a Straight-Through Processing money broker, Infinity Union Markets Ltd. routes client orders to external liquidity providers acting as principal. The execution price, fill quality and availability of liquidity depend on those third parties. Infinity Union Markets Ltd. does not guarantee the financial soundness of any external counterparty.

## 6. Technology and Operational Risk

Online trading systems, software, internet connectivity, hardware and third-party services may be subject to interruption or failure. Such interruptions may prevent you from placing or modifying orders. We do not accept liability for losses arising from system, communication or third-party failures beyond our reasonable control.

## 7. No Investor Compensation Scheme

Labuan IBFC does not operate an investor compensation scheme equivalent to the UK FSCS or the US SIPC. In the event of insolvency, your claim against client monies will rank in accordance with applicable Malaysian insolvency law and the segregation arrangements described in our Client Asset Protection Policy.

## 8. No Tax or Investment Advice

Infinity Union Markets Ltd. does not provide investment, legal, tax or accounting advice. Past performance is not indicative of future results. Any market commentary, signals, educational materials or third-party content made available to you is for general information only and does not constitute a personal recommendation.
